

This geological cross-section illustrates the E1b-E1c contact zone. The upper section is labeled An4 (grey). Below it, the E1b unit (dark grey) is shown with a prominent fault on the left. The E1c unit (orange) is located in the center, with a dashed line indicating its boundary with the E1b unit. The E1a unit (dark grey) is shown on the right. The contact between E1b and E1c is marked by a dashed line. The E1c unit contains several small, dark, elongated features, possibly representing mineral inclusions or structures. The cross-section is bounded by a horizontal line at the top and a horizontal line at the bottom, with a scale bar at the bottom indicating 270 m and 280 m.
